PROFILE

I am a highly skilled and detail-oriented web developer with over 8 years of experience specializing in WordPress, Shopify, and full-stack web development. My journey began with a web development certificate from Shaw Academy, which laid the foundation for my career. Over time, I expanded my expertise to include PHP, WordPress plugin and theme customization, and Shopify development. I am also certified in JavaScript and Python, with proficiency in front-end libraries such as SASS, Bootstrap, React, and Redux. Having collaborated with diverse development teams, I have honed my ability to communicate effectively, contribute strategically, and take the lead when needed to drive projects to success.

WORK EXPERIENCE

Freelance Developer

The IT Mogul

2016-2024

- Led a small team of developers in designing and implementing custom WordPress and Shopify themes and plugins for diverse clients.
- Worked extensively with hosting platforms like Hostinger, Interserver, Afrihost and others, handling tasks related to staging environments, backups, and troubleshooting.
- Demonstrated strong skills in DNS configuration, SSL installation, and managing hosting control panels such as cPanel and DirectAdmin.
- Proficient in server-side technologies including Linux and Nginx, regularly using terminal-based tools for server configuration, SSH access, and WordPress file management.
- Developed and maintained high-performance, scalable, and secure eCommerce websites, ensuring optimal functionality and user experience.
- Conducted code reviews to ensure code quality, adherence to best practices, and maintainability of projects.
- Collaborated with stakeholders to gather requirements, define project scope, and establish timelines for WordPress and Shopify projects.
- Managed project budgets, resources, and timelines to deliver high-quality solutions on time and within budget.
- Researched emerging technologies and trends to enhance development processes and team efficiency.
- Implemented SEO best practices to optimize websites for search engine visibility, performance, and engagement.

Web Developer

Pixelolabs

2024-Present

- Develop exceptional web experiences using CMS platforms (WordPress, Shopify, and headless solutions), ensuring seamless functionality and engaging user interfaces.
- Worked mainly with WordPress hosting platforms like WP Engine, Flywheel, and others, and have experience working with the Plesk control panel.
- Assist with existing web properties, integrating new features into ongoing projects and optimizing website performance.
- Lead the development of a Shopify checkout extension app using React, working with GraphQL API, branding, checkout UI extensions, and Shopify Functions to enhance eCommerce experiences.
- Research and troubleshoot complex technical issues, providing innovative solutions and ensuring project continuity.
- Implement SEO best practices and Accessibility principles to enhance website visibility, performance, and inclusivity.
- Work closely with clients on select projects, serving as a liaison to ensure alignment with their vision and requirements.
- Collaborate with teams using project management software such as Asana and Teamwork to ensure smooth project execution and timely delivery.
